

CTR SURVEY REPORT— Executive Summary

This report contains your survey results for the State of Washington's Commute Trip Reduction Program. It measures your worksite's changing commute modes. This information is used to estimate the program's contributions to reducing congestion, fuel consumption and air pollution in our state.

Employer ID: T99999
Employer:
Worksite:
Street: 66 Painted Tunnel Way SW
Jurisdiction: City of Seattle
Zone: Seattle Central Business District
Survey Date: 10/16/2004
Survey Type: First Measurement

Progress Measured with this Survey

Did the worksite meet its CTR goal*? No

For affected employees only:**

How much have the rates changed from the last survey?

SOV down 11%
VMT up 48%

How much have the rates changed from the baseline survey?

SOV down 11%
VMT up 48%

Employee and Survey Response Information

Total employees at worksite	1,040
Est. CTR-affected** employees at worksite	964
Surveys distributed	1,040
Surveys returned	721
Response rate	69.3%
Surveys returned by affected employees	668
Did this worksite meet the criteria for surveying all employees?	Yes
Is this worksite eligible to use results for all employees in meeting goal?	Yes
Did this worksite meet the minimum response rate of 70%?	No

Because the response rate for this worksite is below 70%, the survey results have been adjusted by automatically identifying the non-responding employees between the actual response rate and 70% as SOV commuters (fill-in).

Goal Summary

	Worksite Baseline***	Baseline Used	Goal	Survey Results with fill-in	Survey Results w/o fill-in	Did worksite make goal*?	Next Goal
SOV RATE:							
Affected Employees	64%	64%	54%	57%	57%	No	51%
All Employees	64%	64%	54%	58%	57%	No	51%
VMT:							
Affected Employees	12.5	12.5	10.6	18.5	18.4	No	10.0
All Employees	12.5	12.5	10.6	19.1	19.0	No	10.0

*To make goal, the worksite must attain either the single occupant vehicle (SOV) goal OR the vehicle miles traveled (VMT) goal. Survey processing uses the calculations that are most advantageous for the worksite (e.g., VMT vs. SOV) to determine whether the site has met goal. SOV refers to a motor vehicle occupied by one employee for commute purposes. VMT is the sum of miles traveled by motor vehicles, divided by the number of employees.

**An "affected" employee is a person who works full-time and who begins a regular work day at a single worksite between 6 and 9am on two or more weekdays for at least twelve continuous months.

* For an explanation of terms, please see the Guide to Employee Surveys at <http://www.wsdot.wa.gov/tdm/tripreduction/download/surveyguide.pdf>

** Percentages do not sum to 100% if employees used more than one mode during the survey week.

*** From question 4a, days reported as compressed workweek day off.

**** "Other" may include other modes of transportation or working situations where employees traveled out of town on business, attended a conference or training off-site, or had other unusual work arrangements during the survey week.
